

# Artificial intelligence

AI doesn't *want*, it doesn't have *goals*,  
it doesn't want to *kill you*  
because it's not alive.

And AI is a machine — is not going to  
come alive any more than your toaster will.

**Marc Andreessen,**  
who believes opponents of AI  
are cultists — “fun to hear about”  
and “engaging at dinner parties and on TV”  
[perhaps comparing AI to someone else's gun  
is more apt than comparing it to your toaster]
