

## **Campaign finance**

**While it is true that he [Trump] hasn't taken corporate money, the implication that he has personally spent 20 to 25 million dollars is a bit of a stretch because what he's actually done is loaned his own campaign 17 and a half million dollars and personally given just \$250,000. That's important because up until the convention, he can pay himself back the loan with campaign funds. And if you don't think there's a significant difference between a gift and a loan, try giving your spouse an anniversary loan and see how that goes.**
