

# **Global warming**

**Global carbon emissions  
will have to decline  
45% by 2030**

**to avoid apocalyptic global warming  
according to a 728-page UN report  
released on Oct. 8.**

**It says a 2C temperature rise could  
trigger an irreversible domino effect  
as tropical rainforests die and  
methane-rich permafrost melts.**

**Bloomberg Businessweek, October 16, 2018**
