

Impeachment

Even if you don't love originalism in general, you might love it for impeachment. That might seem like an opportunistic position, but it has unmistakable logic. ... the problems confronted way back in 1787 are not so different from those we confront today. ... the abstract concerns that motivated them — treason, bribery, corruption, egregious abuse of public trust or misuse of presidential authority — are no different from those that concern us today. *They are exactly the same.*
