Kwiplers say

Count votes in Congress by:

1. Calculating a Member's Proportional Vote (MPV) for each voting member, as follows:

$$MPV = SPNP / NLRS$$

where:

   SPNP = State's Percentage of the National Population

   NLRS = Number of Legislators Representing the State (in that legislature)

2. Totaling "yes" MPVs and "no" MPVs

3. Passing if total MPV is more than 50
