

Manufacturing

In all, there were more than 350,000 manufacturing establishments with no employee other than the owner in 2014, up almost 17% from 2004, according to the most recent Commerce Department data.

By comparison, there were 292,543 establishments with other employees, down 12%. The shift creates a challenge for building back the number of jobs in the U.S. manufacturing sector.
