

Plans

And that's both the beauty and the beast of plans: when they are detailed, they force transparency into the debate.

Good plans or bad plans, they all start with a set of facts — or at least the facts the planner is working with.

Next they provide a statement of the problem, followed by a plan to fix it.

But a complex problem usually means that a lot of different factors are in play, so a plan for solving the problem introduces a lot of complexity.
