

Presidential immunity from criminal prosecution

**With its adoption of a paradigm
that sometimes exempts the President
from the dictates of the law
(when the Court says so),
this Court has effectively snatched from
the Legislature the authority to bind the
President (or not) to Congress's mandates,
and it has also thereby substantially
augmented the power of both the
Office of the Presidency and itself.**

**Katanji Brown Jackson,
dissent, Trump v. United States**
