

Science

If science can do anything,
it is precisely to uproot and destroy
any such thing as a "meaning"!

And forget about science or
academic knowledge as a path
"to God" – these are precisely
the forces hostile and foreign to God.
No one – whether he admits it or not –
can doubt in his heart of hearts
that this is what the sciences are.

**Max Weber, "The Scholar's Work"
in *Charisma and Disenchantment*,
translated by Damion Searls**
