

The Senate

Because of the way the modern Senate has evolved, combined with the trends of polarization and negative partisanship that have shaped America, this faction [of wealthy white anti-choice conservatives] is able to wield power far out of proportion to its numbers.

The modern Senate gives it the power to exercise a veto over policies backed by a majority of the population and makes likely that it will have the power do so in perpetuity. This is not just a minority. This is a superminority.
