[T]he Green New Deal is already branded in the public's mind. Just as Ms Ocasio-Cortez is known by her initials – AOC – her bill is already known by its shorthand, GND. Few politicians, or bills, make that distinction. Think of John F Kennedy (JFK) or Franklin Delano Roosevelt (FDR). The fact that a 29-year-old former bar-tender has gone from zero to ubiquitous abbreviation in a few months tells us something about America's appetite for change. She is now the most influential figure in US politics after Mr Trump.
