

Trumpism

When scientists examine a species that resembles another, but only incompletely or imperfectly, they add the suffix *oid*.

A chemical compound that's not quite an alkaline is an *alkaloid*;
an orbiting space rock not quite a planet is a *planetoid*.

In the same way,
Trump and his ilk are *fascoïd* — near it,
but not quite the same,
a failure even as fascists.

David Frum, *Trumpocalypse*
