

Wretched excess

Porsche Design Tower, the new Sunny Isles Beach condo that has attracted worldwide attention for its unique car elevator, has sold a four-level penthouse with a garage for 11 vehicles for \$25 million.

Dezer Development said the unit totals 9,560 square feet of interior space, making the price equate to \$2,615 per square foot. It includes a "car gallery" on the 56th floor where the tower's specially-designed car elevator can transport the vehicles from the ground to the sky-high space.
